# LIST OF CONTENTS

## NUMBER 1

| | | |
|---|---|---|
| **L. Sun** | 1 | A closed-form solution of beam on viscoelastic subgrade subjected to moving loads |
| **B. Nedjar** | 9 | An enthalpy-based finite element method for nonlinear heat problems involving phase change |
| **G. R. Liu, J.-J. Zhou** and **J. G. Wang** | 23 | Coefficients identification in electronic system cooling simulation through genetic algorithm |
| **G. P. Guruswamy** | 31 | A review of numerical fluids/structures interface methods for computations using high-fidelity equations |
| **H. T. Rathod** and **Md. Shajedul Karim** | 43 | An explicit integration scheme based on recursion for the curved triangular finite elements |
| **S. Modak** and **E. D. Sotelino** | 77 | An object-oriented programming framework for the parallel dynamic analysis of structures |
| **M. K. Apalak** and **R. Gunes** | 85 | On non-linear thermal stresses in an adhesively bonded single lap joint |
| **Y.-q. Zhao, S.-h. Chen, S. Chai** and **Q.-w. Qu** | 99 | An improved modal truncation method for responses to harmonic excitation |
| | I | Calendar |

## NUMBER 2

| | | |
|---|---|---|
| **E. Garusi** and **A. Tralli** | 105 | A hybrid stress-assumed transition element for solid-to-beam and plate-to-beam connections |
| **U. Lee** and **J. Shin** | 117 | An frequency response function-based structural damage identification method |
| **J. Lee** and **S.-E. Kim** | 133 | Flexural–torsional coupled vibration of thin-walled composite beams with channel sections |
| **C. M. Wang, Y. C. Wang** and **J. N. Reddy** | 145 | Problems and remedy for the Ritz method in determining stress resultants of corner supported rectangular plates |
| **H.-C. Tsai** and **T.-C. Lee** | 155 | Dynamic analysis of linear and bilinear oscillators with rate-independent damping |
| **P.-H. Wang, H.-T. Lin** and **T.-Y. Tang** | 165 | Study on nonlinear analysis of a highly redundant cable-stayed bridge |
| **C. Song** and **J. P. Wolf** | 183 | Semi-analytical representation of stress singularities as occurring in cracks in anisotropic |

multi-materials with the scaled boundary finite-element method

**M. Kwon** and **E. Spacone** 199 Three-dimensional finite element analyses of reinforced concrete columns

I Calendar

NUMBERS 3–4

**H. Çetinel, H. A. Özyiğit** and **L. Özsoyeller** 213 Artificial neural networks modeling of mechanical property and microstructure evolution in the Tempcore process

**A. Kaveh** and **H. A. Rahimi Bondarabady** 219 A hybrid method for finite element ordering

**S.-H. Park** and **J.-H. Kim** 227 Dynamic stability of a stiff-edged cylindrical shell subjected to a follower force

**P.-S. Lee** and **K. J. Bathe** 235 On the asymptotic behavior of shell structures and the evaluation in finite element solutions

**J.-O. Lee, Y.-S. Yang** and **W.-S. Ruy** 257 A comparative study on reliability-index and target-performance-based probabilistic structural design optimization

**J. Kochupillai, N. Ganesan** and **C. Padmanabhan** 271 A semi-analytical coupled finite element formulation for shells conveying fluids

**X. M. Zhang** 287 Parametric studies of coupled vibration of cylindrical pipes conveying fluid with the wave propagation approach

**J.-R. Lin, C.-H. Hsu** and **C. Lai** 297 Surface roughness effects on the oscillating squeeze-film behavior of long partial journal bearings

**C. Degand** and **C. Farhat** 305 A three-dimensional torsional spring analogy method for unstructured dynamic meshes

**R. Niekamp** and **E. Stein** 317 An object-oriented approach for parallel two- and three-dimensional adaptive finite element computations

**J. Murín** and **V. Kutiš** 329 3D-beam element with continuous variation of the cross-sectional area

**G. D. Hatzigeorgiou** and **D. E. Beskos** 339 Dynamic elastoplastic analysis of 3-D structures by the domain/boundary element method

**G. Ghodrati Amiri** 349 Seismic sensitivity indicators for tall guyed telecommunication towers

*Technical note*
**A. Poullikkas, A. Karageorghis** and **G. Georgiou** 365 The method of fundamental solutions for three-dimensional elastostatics problems

I Calendar

**NUMBERS 5–6**

**A. K. Slone, K. Pericleous, C. Bailey** and **M. Cross** 371 Dynamic fluid–structure interaction using finite volume unstructured mesh procedures

**V. Apostol, J. L. T. Santos** and **M. Paiva** 391 Sensitivity analysis and optimization of truss/beam components of arbitrary cross-section
II. Shear stresses

**Y. Huang, S. Di, C. Wu** and **H. Sun** 403 Bending analysis of composite laminated plates using a partially hybrid stress element with interlaminar continuity

**C.-c. Wu, P. He** and **Z. Li** 411 Extension of *J* integral to dynamic fracture of functional graded material and numerical analysis

**D. A. Castello, L. T. Stutz** and **F. A. Rochinha** 417 A structural defect identification approach based on a continuum damage model

**S. V. Modak, T. K. Kundra** and **B. C. Nakra** 437 Comparative study of model updating methods using simulated experimental data

**R. Ansola, J. Canales, J. A. Tárrago** and **J. Rasmussen** 449 An integrated approach for shape and topology optimization of shell structures

**E. J. Sapountzakis** and **J. T. Katsikadelis** 459 A new model for slab and beam structures—comparison with other models

**W. M. Jenkins** 471 A decimal-coded evolutionary algorithm for constrained optimization

**M. Haiba, D. C. Barton, P. C. Brooks** and **M. C. Levesley** 481 Review of life assessment techniques applied to dynamically loaded automotive components

**M. Bäker, J. Rösler** and **C. Siemers** 495 A finite element model of high speed metal cutting with adiabatic shearing

**L. Simões da Silva, A. Santiago** and **P. V. Real** 515 Post-limit stiffness and ductility of end-plate beam-to-column steel joints

I Calendar

**NUMBERS 7–8**

**M. Chiesa, B. Skallerud** and **D. Gross** 533 Closed form line spring yield surfaces for deep and shallow cracks: formulation and numerical performance

**B. Assa** and **M. Dhanasekar** 547 A numerical model for the flexural analysis of short reinforced masonry columns including bond–slip

**N. L. Pedersen** 559 Topology optimization of laminated plates with prestress

**N. D. Lagaros, M. Papadrakakis** and **G. Kokossalakis** 571 Structural optimization using evolutionary algorithms

**J. K. Vethecan** and **A. Subic** 591 Recursive identification of modal participation in substructuring applications

**B. Fox, L. S. Jennings** and **A. Y. Zomaya** 605 On the modelling of actuator dynamics and the computation of prescribed trajectories

**H.-G. Kwak** and **S.-P. Kim** 615 Nonlinear analysis of RC beams based on moment–curvature relation

**Z. Zhao** and **C. Chen** 629 A fuzzy system for concrete bridge damage diagnosis

**K. Davey, S. Bounds, I. Rosindale** and **M. T. Alonso Rasgado** 643 A coarse preconditioner for multi-domain boundary element equations

**B. A. Izzuddin, A. A. F. M. Siyam** and **D. Lloyd Smith** 659 An efficient beam–column formulation for 3D reinforced concrete frames

**B. Brank** 677 An energy conserving non-linear dynamic finite element formulation for flexible composite laminates

*Technical note*
**A. Arpaci** and **E. Bozdag** 691 On free vibration analysis of thin-walled beams with nonsymmetrical open cross-sections

I Calendar

**NUMBERS 9–10**

**SPECIAL ISSUE**

**Shells: Theoretical Formulation, Mathematical Analysis and Finite Element Implementation**

697 Editorial

**B. Brank, J. Korelc** and **A. Ibrahimbegović** 699 Nonlinear shell problem formulation accounting for through-the-thickness stretching and its finite element implementation

**W. B. Krätzig** and **D. Jun** 719 Multi-layer multi-director concepts for *D*-adaptivity in shell theory

**F. Auricchio, L. Beirão da Veiga** and **C. Lovadina** 735 Remarks on the asymptotic behaviour of Koiter shells

**P. Karamian-Surville, J. Sanchez-Hubert** and **É. Sanchez-Palencia** 747 Propagation of singularities and structure of layers in shells
Hyperbolic case

**L. L. Thompson** and **S. R. Thangavelu** 769 A stabilized MITC element for accurate wave response in Reissner–Mindlin plates

**F. Abed-Meraim** and **A. Combescure** 791 SHB8PS—a new adaptative, assumed-strain continuum mechanics shell element for impact analysis

**M. Harnau** and **K. Schweizerhof** 805 About linear and quadratic "Solid-Shell" elements at large deformations

**S. Cen, Y. Long** and **Z. Yao** 819 A new hybrid-enhanced displacement-based element for the analysis of laminated composite plates

**P. Massin** and **M. Al Mikdad** 835 Nine node and seven node thick shell elements with large displacements and rotations

**R. Piltner** 849 Low order plate bending elements with enhanced strains

**W. Wagner, S. Klinkel** and **F. Gruttmann** 857 Elastic and plastic analysis of thin-walled structures using improved hexahedral elements

**O. A. Bauchau, J.-Y. Choi** and **C. L. Bottasso** 871 Time integrators for shells in multibody dynamics

**I. Lubowiecka** and **J. Chróścielewski** 891 On dynamics of flexible branched shell structures undergoing large overall motion using finite elements

**M. Amabili, F. Pellicano** and **M. P. Païdoussis** 899 Non-linear dynamics and stability of circular cylindrical shells conveying flowing fluid

907 Calendar

NUMBER 11

**S. S. Akhiev, U. Aldemir** and **M. Bakioglu** 909 Multipoint instantaneous optimal control of structures

**M. Ghazi, M. M. Attard** and **S. J. Foster** 919 Modelling triaxial compression using the Microplane formulation for low confinement

| | | |
|---|---|---|
| **M. Sekulovic, R. Salatic** and **M. Nefovska** | 935 | Dynamic analysis of steel frames with flexible connections |
| **C. E. N. Mazzilli** and **O. G. P. Baracho Neto** | 957 | Evaluation of non-linear normal modes for finite-element models |
| **X. K. Zhu** and **Y. J. Chao** | 967 | Effects of temperature-dependent material properties on welding simulation |
| **J. H. Sung** and **B. M. Kwak** | 977 | Large displacement dynamic analysis with frictional contact by linear complementarity formulation |
| **M. Tadi** | 989 | Compensator design for a supersonic panel flutter |
| **C. Faella, E. Martinelli** and **E. Nigro** | 1001 | Steel and concrete composite beams with flexible shear connection: "exact" analytical expression of the stiffness matrix and applications |
| **A. Prokić** | 1011 | New finite element for analysis of shear lag |
| | I | Calendar |

**NUMBER 12**

**SPECIAL ISSUE**

**Progress in Probabilistic Mechanics and Structural Reliability**

| | | |
|---|---|---|
| | 1025 | Editorial |
| **P. M. Mariano, M. Gioffré, F. L. Stazi** and **G. Augusti** | 1027 | Microcracked bodies with random properties: a preliminary investigation on localization phenomena |
| **K. K. Phoon, S. P. Huang** and **S. T. Quek** | 1049 | Simulation of second-order processes using Karhunen–Loeve expansion |
| **G. Bartoli, C. Borri** and **L. Facchini** | 1061 | Simulation of non-Gaussian wind pressures on a 3-D bluff body and estimation of design loads |
| **C. Borri, C. Costa** and **W. Zahlten** | 1071 | Non-stationary flow forces for the numerical simulation of aeroelastic instability of bridge decks |
| **J. Wu, R. R. Zhang, S. Radons, X. Long** and **K. K. Stevens** | 1081 | Vibration analysis of medical devices with a calibrated FEA model |
| **M. Savoia** | 1087 | Structural reliability analysis through fuzzy number approach, with application to stability |
| **R. C. Penmetsa** and **R. V. Grandhi** | 1103 | Efficient estimation of structural reliability for problems with uncertain intervals |

**E. S. Gharaibeh, D. M. Frangopol** and **T. Onoufriou** 1113 Reliability-based importance assessment of structural members with applications to complex structures

**T. Onoufriou** and **D. M. Frangopol** 1133 Reliability-based inspection optimization of complex structures: a brief retrospective

I Calendar

NUMBER 13

**J. Cheng, J.-J. Jiang, R.-C. Xiao** and **H.-F. Xiang** 1145 Advanced aerostatic stability analysis of cable-stayed bridges using finite-element method

**Z.-M. Huang** 1159 On a general constitutive description for the inelastic and failure behavior of fibrous laminates—Part I: Lamina theory

**Z.-M. Huang** 1177 On a general constitutive description for the inelastic and failure behavior of fibrous laminates—Part II: Laminate theory and applications

**C. Zhang, Y. K. Cheung, S. Di** and **N. Zhang** 1201 The exact solution of coupled thermoelectroelastic behavior of piezoelectric laminates

I Calendar

NUMBERS 14–15

**J. G. J. Beijer** and **J. L. Spoormaker** 1213 Solution strategies for FEM analysis with nonlinear viscoelastic polymers

**S.-U. Ryu, Y. Sugiyama** and **B.-J. Ryu** 1231 Eigenvalue branches and modes for flutter of cantilevered pipes conveying fluid

**N. B. Naduvinamani, P. S. Hiremath** and **G. Gurubasavaraj** 1243 Effect of surface roughness on the static characteristics of rotor bearings with couple stress fluids

**P. Gasbarri, A. Mannini** and **R. Barboni** 1255 Dynamic modeling of swept wing with PTFE method

**K.-J. Bathe** and **H. Zhang** 1267 A flow-condition-based interpolation finite element procedure for incompressible fluid flows

**M. Jirásek** and **B. Patzák** 1279 Consistent tangent stiffness for nonlocal damage models

**J. Kim, S.-J. Kang** and **B.-S. Kang** 1295 Computational approach to analysis and design of hydroforming process for an automobile lower arm

**H. S. Park** and **C. W. Sung** 1305 Optimization of steel structures using distributed simulated annealing algorithm on a cluster of personal computers

**M. Toulios** and **P. A. Caridis** 1317 The effect of aspect ratio on the elastoplastic response of stiffened plates loaded in uniaxial edge compression

**K. Yu. Volokh** and **A. Needleman** 1329 Buckling of sandwich beams with compliant interfaces

I Calendar

NUMBERS 16–17

**M. L. Romero, P. F. Miguel** and **J. J. Cano** 1337 A parallel procedure for nonlinear analysis of reinforced concrete three-dimensional frames

**Y. F. Rashed** 1351 BEM for dynamic analysis using compact supported radial basis functions

**O. O. R. Famiyesin, K. D. Oliver** and **A. A. Rodger** 1369 Semi-empirical equations for pipeline design by the finite element method

**N. S. Que** and **F. Tin-Loi** 1383 An optimization approach for indirect identification of cohesive crack properties

**K.-N. Koo** 1393 Vibration and damping analysis of composite plates using finite elements with layerwise in-plane displacements

**R. Ribó, G. Bugeda** and **E. Oñate** 1399 Some algorithms to correct a geometry in order to create a finite element mesh

**J. P. Yang** and **S. X. Chen** 1409 Vibration predictions and verifications of disk drive spindle system with ball bearings

**W. Ostachowicz, M. Krawczuk** and **M. Cartmell** 1419 The location of a concentrated mass on rectangular plates from measurements of natural vibrations

**Z. Xiang, G. Swoboda** and **Z. Cen** 1429 Identification of damage parameters for jointed rock

**R. El Fatmi** and **H. Zenzri** 1441 On the structural behavior and the Saint Venant solution in the exact beam theory
Application to laminated composite beams

I Calendar

NUMBERS 18–19

**M. Walker** and **R. Smith** 1457 A computational methodology to select the best material combinations and optimally design composite sandwich panels for minimum cost

**J.-J. Wu, M. P. Cartmell** and **A. R. Whittaker** 1461 Prediction of the vibration characteristics of a full-size structure from those of a scale model

**J. K. Sinha** and **M. I. Friswell** 1473 Simulation of the dynamic response of a cracked beam

**P. M. Mohite** and **C. S. Upadhyay** 1477 Local quality of smoothening based a-posteriori error estimators for laminated plates under transverse loading

**H. J. Pradlwarter** 1489 Deterministic integration algorithms for stochastic response computations of FE-systems

**F. Venancio Filho, A. M. Claret** and **F. S. Barbosa** 1503 Frequency and time domain dynamic structural analysis: convergence and causality

**M. Cervera, R. Faria, J. Oliver** and **T. Prato** 1511 Numerical modelling of concrete curing, regarding hydration and temperature phenomena

**Th. Rottner, K. Schweizerhof, I. Lenhardt** and **G. Alefeld** 1523 On applications of parallel solution techniques for highly nonlinear problems involving static and dynamic buckling

**Y. Yang** and **C. K. Soh** 1537 Automated optimum design of structures using genetic programming

**T. Hong** and **J. G. Teng** 1547 Non-linear analysis of shells of revolution under arbitrary loads

**H.-J. Kim, H. S. Yang** and **Y.-P. Park** 1569 Improving the vehicle performance with active suspension using road-sensing algorithm

I Calendar

**NUMBERS 20–21**

iii Editorial

*Review articles*

**S. C. Dutta** and **R. Roy** 1579 A critical review on idealization and modeling for interaction among soil–foundation–structure system

**J. Mackerle** 1595 FEM and BEM in the context of information retrieval

*Regular papers*

**E. Sandgren** and **T. M. Cameron** 1605 Robust design optimization of structures through consideration of variation

**K. E. Barrett** and **A. C. Gotts** 1615 Finite element analysis of a compressible dynamic viscoelastic sphere using FFT

**S. C. Lee** and **S. W. Han** 1627 Neural-network-based models for generating artificial earthquakes and response spectra

**C. Liu, D. Huang** and **T.-L. Wang** 1639 Analytical dynamic impact study based on correlated road roughness

**D. Tang, C. Yang, H. Walker, S. Kobayashi** and **D. N. Ku** 1651 Simulating cyclic artery compression using a 3D unsteady model with fluid–structure interactions

**A. D. Hanganu, E. Oñate** and **A. H. Barbat** 1667 A finite element methodology for local/global damage evaluation in civil engineering structures

I Calendar

NUMBER 22

**A. M. Alkhaleefi** and **A. Ali** 1689 An efficient multi-point support-motion random vibration analysis technique

**M. Lefik** and **B. A. Schrefler** 1699 Artificial neural network for parameter identifications for an elasto-plastic model of superconducting cable under cyclic loading

**F.-C. Chen** and **Y.-F. Tzeng** 1715 On the dynamics of spring-type operating mechanism for 69 KV $SF_6$ gas insulated circuit breaker in open operation

**A. Pantano** and **R. C. Averill** 1725 A penalty-based finite element interface technology

I Calendar

NUMBER 23

**K. S. Sai Ram** and **T. Sreedhar Babu** 1749 Free vibration of composite spherical shell cap with and without a cutout

**M. Aryanpour** and **M. Ghorashi** 1757 Load carrying capacity of circular and annular plates using an arbitrary yield criterion

**M. Toparli, S. Sahin, E. Ozkaya** and **S. Sasaki** 1763 Residual thermal stress analysis in cylindrical steel bars using finite element method and artificial neural networks

**S. W. Chung, S. J. Kim** and **J. H. Kim** 1771 Finite element simulation of metal forming and in-plane crack propagation using ductile continuum damage model

**M.-W. Guo, I. E. Harik** and **W.-X. Ren** 1789 Semi-discrete finite element analysis of slab–girder bridges

**M. Yocum** and **H. Abramovich** 1797 Static behavior of piezoelectric actuated beams

I Calendar

NUMBER 24

**M. Palacz** and **M. Krawczuk** 1809 Analysis of longitudinal wave propagation in a cracked rod by the spectral element method

**F. C. Lin** and **S. Y. Lin** 1817 Radius ratio estimation and fold situation prediction of the deformation profile in forging–extrusion process

**J. Laukkanen** 1827 FEM analysis of a travelling web

**W. Wagner** and **F. Gruttmann** 1843 A displacement method for the analysis of flexural shear stresses in thin-walled isotropic composite beams

**W. Song, A. Keane, J. Rees, A. Bhaskar** and **S. Bagnall** 1853 Turbine blade fir-tree root design optimisation using intelligent CAD and finite element analysis

I Calendar
